

Status 3, 4, 8 - Comments:

3065: EU: Project of interest but needs to be rewritten with more technical details;

3074: EU: rewrite resubmit;

3097: EU: Innovative project of economical interest with safety aspect but needs to be rewritten with

more details about the way of applications and to be presented with EU industrial collaborators.;

3098: EU: Project is worth to be funded with enlarged team of EU collaborators;

3106: EU: No evaluation at this stage; collaboration with European participants is rather weak and doubts

about the economic interest;

3108: EU: collaborators non industrials. Co-funding possible with european industrial collaborators to be found by Institute

Possible contacts : Dr robert Terörde -Strijkviertel 67 - 3454 PK De Meeern - The Netherlands

3109: EU: Interesting project with economic perspectives but needs collaborators from eu ndustry.

3115: EU: interesting project with industrial and economic aspects but improvment is needed.

Needs of

collaboration from industry from EU . To be rewritten.;

3120: EU: European collaborators not yet convincing of involvement in the project. Before further consideration for funding: to find other European collaborators. To introduce proposals technical applications while

reducing budget.;

3130: EU: Interesting project with economical potential. Should be reorganised and rewritten with European industrial collaborators.;

3131: EU: To be rewritten by taking in account state of art, market applications etc. Look for EU industrial collaborators.;

3136: EU: project of importance but needs to be improved by justifying the technical choices.

Partnership

or financial participation by collaborators should be explored.;

3160: EU: Potential interest but without information about the realisation of such a system. No industrial

collaborators. To be resubmitted with more details about realisation and with EU industrial collaborators.;

3162: EU: Project of technical and economical interest that needs to be rewritten in association with

industrial collaborators, taking in view the market.

3163: EU: The project needs to be improved with EU collaborators of industry in the field of composites.

3186: EU: Interesting project but project must be restructured. By reducing the number of partners, with

better coordination, by presenting what would be the tasks. There should be more European collaborators from

industry.

3188: EU: rewrite with more details;

3189: EU: Co-financing by EU collaborators and by other parties required for further EU consideration.

3195: EU: Co-financing by EU collaborators and by other parties required for further EU consideration.

3204: EU: Interesting project but needs collaborator from industry before further consideration;

3209: US: R&R paragraph: the proposal was judged eligible for R&R. However, there is no guarantee as regards

future possible funding. Authors need to work together with the collaborator(s) to revise and resubmit this proposal

They need to answer the questions raised by the reviewers thoroughly. In particular, the English needs to be improved. Once this proposal is revised, it will be considered again.

3215: EU: Interesting economical project that needs European industrial collaborators that could also

involve themselves in co-funding;

3221: EU: Possible interesting project that must be reviewed and resubmitted by implying European

industrial collaborators. To include corrosion testing in the project and reduce the staff. Schedule to be improved

also.;

3226: EU: No justification of technical choices and no comparison with other technologies;

3234: EU: Interesting project that needs collaborators from research agency or from industry before

further consideration;

3249: EU: interesting subject but needs more collaborators from Europe, specially from industrial sector

before further consideration;

3250: EU: Actual subject but the proposal is too much ambitious and without collaborators from industry.

To rewrite with industrial collaborators and to resubmit. ;

3258: EU: Co-financing by EU collaborators and by other parties required for further EU consideration.

3263: EU: Needs to be rewritten with more detailed information about how to reach the goals and with

explanation of technical choices. Find industrial collaborators

3282: EU: rewrite resubmit;

3285: EU: The proposal is badly prepared, there is a considerable number of animal tests involved, which

is lacking the proof with European testing standards, could be resubmitted with improved preparation;

3286: EU: rewrite resubmit;

3290: EU: The subject is relevant. The description of the project should be improved by considering the

progress in Western Europe.;

3296: EU: Relevant project whose redaction must be improved in collaboration with more European

partners. Particularly with industrialists implied with interest on potential application. Links with European research

should be established through FP6 NMP "INMAR" project.;

3307: EU: Co-financing required for further EU consideration;

3310: EU: Co-financing required for further EU consideration;

3317: EU: there is no European industrial collaborator. Such collaborator should involve in co-funding.

3333: EU: Relevant subject but no real workplan. Need of detailed milestones and quantified output.

Market output is not convincing, to be improved. Presence of European industrial or commercial collaborators is

necessary before further consideration;

3335: EU: co-funding possible with European collaborators like end-users (supplier or operators of water treatment plants).

3339: EU: project that should be co-funded with European collaborators who would be helpful for commercialization

3345: EU: relevant project to be modified in collaboration with more European partners. Particularly with

industrialists implied with potential application in order to have realistic market approach; other techniques more

suitable for industrial processes should be linked to the project.;

3348: EU: The subject is relevant, but the quality of the proposal has to be improved

3372: EU: project that should be improved and have industrial collaborators from the field of satellites (Alcatel, Astrium ...), aircrafts or railway construction (Altom, Siemens,).

Improvement of the project should consist in :

- real presentation of scientific or technical originality

- presentation of technical outputs

- experimental part for validation of numerical simulation should be added

3379: EU: The proposal is scientifically excellent but needs some improvements in terms of the European partnership

3416: EU: Co-funding by EU collaborators is required for further collaboration

3427: EU: find european collaborators before further consideration. Possibility with Universidad Politecnica de Madrid Professor Velarde gvelarde@denim.upm.es

3452: EU: Co-funding is required for further collaboration

3527: US: Contingent upon finding U.S. collaborator

3556: EU: Good project with commercial value that could be co-funded with european collaborators that should commit themselves in co-funding or in partnership

3593: EU: Co-financing by EU collaborators and by other parties required for further EU consideration.

GE-126: EU: Possible co-funding with US.
